

JOHAN DANIELSSON

TOOLS PROGRAMMER

johandanielsson.net

EDUCATION

HIGHER VOCATIAL SCHOOL, GAME PROGRAMMING

2024 - 2027, TGA, Malmö

BACHELOR OF MECHANICAL ENGINEERING

2018 - 2021, HIS, Skövde

PROFILE

I am a tools and gameplay programmer that loves to improve the workflow and ease of development in projects. Helping others and making their life or work processes easier or more enjoyable is what makes work most enjoyable!

EXPERIENCE

ENGINEERING CONSULTANT SIGMA INDUSTRY SOUTH - SAAB KOCKUMS

2022 - 2024, Lund/Malmö

As a component engineer at SAAB Kockums, I took the role of being a support for the bigger engineering team. I communicated between different departments as well as constructing new parts for the submarine and surface vessels. During my time at SAAB, I also got the chance to be a mentor for four new employees and teaching them at the start of their careers. I also developed new and maintained old tools for the internal team, e.g. ease the process of verifying bigger tasks through Excel.

SUMMER JOB SAAB KOCKUMS

2025, Malmö

During my summer job at SAAB, I got the chance to redesign and help with the development of their internal catalog to make it easier to use and future proof.

PROJECT COORDIANTOR TGA

2025 - 2026, Malmö

During my last year of TGA I wanted to improve my leader / speaking skills, so I took a bigger role in holding meetings and coordinating parts of the projects. The biggest of these was to have a presentation and rundown on previous projects with the group to understand their wants and expectations. This helped to create a friendlier environment and more used tools.

SKILLS

Game Development:

- Unity
- C++
- C#
- Iterative development
- Scrum

Engineering:

- Creo
- Windchill
- Technical Drawing Desgin

General:
